PROFESSIONAL SUMMARY

Computer Science & Engineering student and Python Developer skilled in Python, Flask, JavaScript, HTML5, CSS3, REST APIs, Git/GitHub, and Data Structures & Algorithms (DSA), with a foundational understanding of Artificial Intelligence and Machine Learning. Hands-on experience building web applications, CRUD-based systems, and API-integrated projects. Seeking an Internship or Entry-Level Software Developer role to apply technical, AI/ML, and problem-solving skills in real-world projects.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, PHP (Basic)
- Web Technologies: HTML5, CSS3, Responsive Web Design, DOM Manipulation
- Frameworks & APIs: Flask, REST API Integration
- Database: Neo4j, Graph Databases
- Tools & Platforms: Git, GitHub, VS Code, Command Line / Terminal
- Core Concepts: Object-Oriented Programming (OOP), File Handling, CRUD Operations, Data Structures & Algorithms (DSA), Problem-Solving, Debugging
- AI/ML: Machine Learning Fundamentals

PROJECTS

SkillConnect – Graph-Powered Career Recommendation System | *Python, Flask, Neo4j, Cypher, HTML, CSS, Jinja2, Render*

- Built a career recommendation web application modeling relationships between skills, courses, and job roles as a graph using Neo4j.
- Wrote Cypher queries to traverse the graph database and generate personalized skill and career-path recommendations for users.
- Developed the Flask backend with Jinja2-templated HTML/CSS frontend and deployed the application on Render.

Personal Portfolio Website | *HTML5, CSS3, JavaScript*

- Designed and developed a fully responsive personal portfolio site showcasing skills, projects, and contact details across desktop and mobile breakpoints.
- Implemented interactive UI elements using vanilla JavaScript (DOM manipulation, event handling) without relying on external frameworks.

Weather Application | *Python, Tkinter, OpenWeatherMap API*

- Built a desktop GUI application that fetches and displays real-time weather data via REST API integration with the OpenWeatherMap API, with error handling for invalid inputs and failed calls.

Student Management System | *Python, File Handling*

- Created a CRUD-based system to add, update, search, and remove student records with file-based persistent storage.

EDUCATION

Qualification	Institute / Board	Year
B.Tech, Computer Science & Engineering	Asian International University	2026
Diploma, Computer Science & Engineering	Government Polytechnic, Koderma	2021
Secondary School (10th)	JAC Board, Ranchi	2018

TRAINING & CERTIFICATIONS

- PHP Training — 15 February 2021 to 13 March 2021

KEY STRENGTHS

- Quick Learner • Team Player • Leadership • Positive Attitude • Hardworking
